

Login Test Cases

User:

Role: You are a senior software QA engineer.

Context: We are testing a simple login page. It has:

- A username field (accepts email format)
- A password field (min 8 characters)
- A "Login" button
- A "Forgot Password" link

Instruction: Generate 8 test cases for this login page.

Constraints: Include at least 2 negative test cases and 1 boundary value test case.

Output Format: Return as a numbered list with: Test ID | Test Case Name | Steps | Expected Result
use reasoning

Assistant:

TC001 | Valid Login |

Steps:

- Enter a valid email (e.g., [user@example.com](#)) in the username field.
 - Enter a valid password (≥8 characters).
 - Click the “Login” button.
- Expected Result:**
- User is successfully logged in and redirected to the home/dashboard page.
-

TC002 | Invalid Email Format |

Steps:

- Enter “userexample.com” (missing @) in the username field.
 - Enter a valid password (≥8 characters).
 - Click the “Login” button.
- Expected Result:**
- Error message displayed: “Please enter a valid email address.”
-

TC003 | Password Too Short (Boundary Test) |

Steps:

Enter a valid email (e.g., [user@example.com](#)).

Enter a 7-character password (one below minimum).

Click the “Login” button.

Expected Result:

Error message displayed: “Password must be at least 8 characters.”

TC004 | Empty Username Field |

Steps:

Leave the username field blank.

Enter a valid password.

Click “Login.”

Expected Result:

Error message displayed: “Username is required.”

TC005 | Empty Password Field |

Steps:

Enter a valid email.

Leave the password field blank.

Click “Login.”

Expected Result:

Error message displayed: “Password is required.”

TC006 | Forgot Password Link |

Steps:

Click on the “Forgot Password” link.

Expected Result:

User is redirected to the password recovery page.

TC007 | Remember Session After Successful Login |

Steps:

Log in with valid credentials.

Close the browser tab.

Reopen the application within session timeout limits.

Expected Result:

User remains logged in without re-entering credentials.

TC008 | Invalid Credentials (Negative Test) |

Steps:

Enter a valid email.

Enter an incorrect password.

Click "Login."

Expected Result:

Error message displayed: "Invalid username or password."
